ONE CITY ONE BOOK

HAMILTON, OH | VOL 1

COMING TO HAMILTON

The One City One Book project grew out of the idea that cities worldwide would participate in a community reading program that attempts to get everyone to read and discuss the same book over a one-month period. Hamilton has selected by a public vote, *Hidden Figures* by Margot Lee Shetterly to read together this October.

Hidden Figures is the untold story of the American dream and the black women mathematicians who helped win the space race. It is our hope that One City One Book will bring together diverse groups of community members to engage in open dialogue about the themes represented in the book.

During the month of October, there will be a variety of activities related to *Hidden Figures*! Programming including a showing of the film, lectures on space, art displays and book discussions are just some of the events that are planned throughout the community. The majority of the activities will be free and the book will be available for checkout at the Lane Libraries! We hope that the inaugural One City One Book will encourage reading and forge bonds of all ages and backgrounds linked by the book and activities. Watch for details in the fall Fast Lane and get updates on Facebook at www.facebook.com/OneCityOneBookHamilton.

Tom Barren lives in a utopian 2016 with flying cars and moon bases. Then he does something stupid and winds up in our 2016, discovering new versions of his family and a possible soul mate. Which reality will he choose? The utopia where he can't find his place or a messy world with problems and possibility? Written memoir-style with short, snappy chapters, this debut novel is not to be missed.
