for re-election

Primaries May 10, 1932

To the Voters of the 2nd-4th Senatorial Districts of Ohio.

The worst panic in the history of the nation is now on and the end is not in sight. What is wrong? Or more properly might I ask what is right? Here we have the most fertile land on Earth; the best supplied with all things necessary to a prosperous and happy people. Our resources are not half developed. Our working people are the most intelligent, energetic and capable on which the sun ever shone. Man for man the world never contained their equal! Their productive capability is the marvel even of this age of industrial miracles—Yet half a million of them in Ohio walk the streets and can find no means of earning a livelihood. The principal problems for our so called statesmen and captains of industry and finance to solve are—

First—How to insure to every person able and willing to work an opportunity to earn an honest livelihood.

Second—To effect a more equitable distribution of wealth among the factors engaged in its production.

Lastly—To fix the cost of the maintenance and development of the Social Order by the establishment of a more just and fair System of Taxation, based upon ability to pay.
